

International Course on Occupational Radiation Dosimetry

“Individual monitoring: a tool in medical surveillance of workers”

April 23, 2015 Bruges, Belgium

The organising committee of the international conference on individual monitoring (IM2015) is pleased to announce an international course on occupational radiation dosimetry.

Purpose

The international training course on occupational radiation dosimetry is aimed specifically for occupational physicians and/or managers of occupational health services who wish both to refresh and to broaden their knowledge in individual monitoring of ionising radiation.

Course information

The course will be held at the international conference on individual monitoring during a special one-day session on Thursday, April 23. The course will cover all aspects of individual monitoring going from physics over external and internal dosimetry to the practical aspects of individual monitoring at workplaces. The lectures will be given by international experts in the field of dosimetry.

Detailed information on the course schedule will be available soon on the IM2015-website.

Practical information

Date: Thursday, April 23, 2014, 9:00-17:00

Location: Site Oud Sint-Jan, Mariastraat 38, 8000 Brugge, Belgium
