

First Announcement

International Conference on Individual Monitoring of Ionising Radiation
April 20-24, 2015 Bruges, Belgium

Scope

The Conference on Individual Monitoring of Ionising Radiation offers dosimetry services, internal monitoring services, research institutes, regulatory authorities, companies, radiation protection experts and networks the opportunity to share and gain knowledge, experiences and new developments in the field of individual monitoring. The five days conference covers all aspects of internal and external dosimetry, from extremity to neutron dosimetry, from guidelines to practical aspects. The programme will include oral and poster presentations of contributed papers. Invited lectures will be given by eminent speakers from Europe and beyond.

Conference topics

- International and European Basic Safety Standards and recommendations
- Quality Assurance, reference fields, type testing and intercomparisons
- New developments in external dosimetry including eye lens and extremity dosimetry
- New developments in bio-assay, in-vivo monitoring and internal dosimetry
- Individual monitoring in medicine, research and industry (nuclear, aircrew, space, NORM and other)
- Dose assessment at workplaces, including exposure to radon and progeny
- Computational methods in individual monitoring
- Dose assessment in emergency exposure situations
- Dose records and reporting, national dose registers and other operational issues of individual monitoring services
- Education, training and networks on individual monitoring
